

"Some of you may remember back to 1985 when Fabricators Unlimited was born, and I, the red FU logo , was created to represent the company.

As the business progressed and grew, a more professional logo was designed , and I made my home "on the shelf" so to speak. Well, to help celebrate our 35 years in business, I am back – new, improved and evolved!

Through the years, I was always fondly referred to as "The Old FU Logo". Because of our celebration, I have now been honored with a real name, Sid. This is short for Assiduous...which means – showing great care, hard work and perseverance. Just a few of the things that are needed for a business to keep their head up and moving forward in today's challenging world of unknowns.

Thank you for being part of our story for 35 years. We will continue to persevere, and will continue to care for those of you who make up our days!

You will be seeing more of me!
Stay safe and healthy!"
